(e.battaglini@ires.it -
elena.battaglini@uniroma3.it)

Technical Secretariat: Eliana Panzironi
(segreteria@ires.it)

The Local Organizers will be presenting some
options for visits and tours on an individual
basis.

The Sense of Place Cultural sustainability and regional development

The overall Conference theme is territorialisation, to be understood as a process which links physical, socio-economic and cultural place-based conditions for sustainable development, encompassing sense-making and giving meaning to places through cultural practices, place identities, narratives, values and sense of place.

The conference theme combines regional development with the main topics of the Cost Action “Investigating Cultural Sustainability”. This combination leads to four thematic lines, that will be explored in the key note sessions:

1. Memory, identity and places.
2. The role of culture in place-framing and making.
3. Urban and regional planning: cultures and practices.
4. Territorialisation: challenges for policies.

These thematic lines will also be reflected in the Parallel sessions, as they deal with different COST book projects. International scholars and experts will be invited as key-note speakers either in Plenaries or to contribute to the Parallel Sessions’ discussion on the topics of the work-in-progress COST books.
